

Wayfinding for All Mobile Applications

- Cross-platform for the most popular mobile operating systems:

- **H2T's** proprietary data-driven algorithm calculates the fastest, or preferred route, on request.
- A revision made to the Back Office data-base applies to all platforms ensuring the most up-to-date information is presented instantly.
- Generate an unlimited number of directions, indoor and outdoor, from any starting point to any destination.
- ADA/508 Compliance compatible.
